**Re: Intel Corporation, Aloha and Ronler Acres Campuses, ACDP 34-2681-ST-01
Calendar Year 2019 Annual Report**

In accordance with the requirements set forth in Oregon Department of Environmental Quality (ODEQ) Permit ACDP 34-2681-ST-01 Condition 77.b., Intel Corporation (Intel) is submitting three (3) copies of this annual report. During calendar year 2019, there was one deviation reported on February 21, 2019 related to an emergency generator maintenance and readiness (M&R) testing event that began on February 6, 2019 at 7:14am and lasted until 8:11am. Part of this M&R test occurred before sunrise (7:25am) and therefore was a deviation of permit condition 45.c.iv. There were no other instances of deviation from any permit requirements within the air permit #34-2681-ST-01 that need to be included in this report for 2019. This annual report is being submitted in a timely manner on or before March 15, 2020 and includes the following:

- 77.b.ii.: The emission fee report
- 77.b.iii.: A summary of the Excess Emissions and Upset log
- 77.b.iv.: The annual certification that the risk management plan is being properly implemented
- 77.b.v.: The type and amount of fuel combusted
- 77.b.vi.: The calculated 12-month rolling emission rates for PM, PM₁₀, PM_{2.5}, SO₂, CO, NO_x, VOC, Fluorides, combined HAPs and individual HAPs

NOTES:

- Reporting for individual HAPs is only required for pollutants with emission rates of 0.1 or more tons/yr.
 - The GHG emissions report will be submitted no later than March 31 as per OAR 340, Division 215.
- 77.b/vii.: Revisions of the pollutant capture efficiency function used for compliance emission calculations in condition 60.
 - 77.b.viii.: A summary of the physical changes, additions and/or process modifications as well as the pollution prevention project(s) performed to offset emission increases associated with these changes/modifications, pre-approved pursuant to Condition 16. In addition, the permittee must identify and summarize any change(s) with the associated emission increase of five (5) or more tons of VOC or one (1) or more tons of any HAP on a yearly basis.
 - 77.b.ix.: Summary of complaints relating to air quality received by permittee during the year.
 - 77.b.x.: List major maintenance performed on pollution control equipment.

Intel Corporation
2501 NE Century Blvd
Hillsboro, OR 97124
www.intel.com

77.b.xi.: There are no applicable Subpart Dc specific reporting requirements for affected facilities that are exclusively natural gas fired.

77.b.ii.: Emission fee report:

Attachment A to this annual report includes Form F1101 as the emission fee report.

77.b.iii.: Summary of the Excess Emissions and Upset log:

There were no excess emissions or upset events in calendar year 2019.

77.b.iv.: Annual certification that the risk management plan (RMP) is being properly implemented:

The Ronler Acres campus has an RMP that was last updated in September of 2018. The RMP is current and is implemented as required. The Aloha campus does not store regulated substances in quantities which exceed the RMP applicability threshold quantities, and therefore does not have an RMP.

77.b.v.: The type and amount of fuel combusted:

The Ronler Acres and Aloha campuses only combust natural gas and diesel fuel. The diesel fuel is fired within the emergency generators and fire pumps, while natural gas is fired in boilers, RCTOs, heaters, and Point of Use (POU) abatement devices. The quantity of these fuels combusted in 2019 are summarized below.

- Diesel Fuel Combusted
 - Aloha: 2,203 gallons
 - Ronler Acres: 46,372 gallons
 - Total: 48,575 gallons
- Natural Gas Combusted
 - Aloha: 160 MMscf
 - Ronler Acres: 1,235 MMscf
 - Total: 1,395 MMscf

77.b.vi.: Calculated 12-month rolling emissions:

Attachment B to this annual report includes the calculated 12-month rolling emission rates for PM, PM₁₀, PM_{2.5}, SO₂, CO, NO_x, VOC, Fluorides, combined HAPs, and individual HAPs with annual emissions of 0.1 or more tons/yr. VOC emissions include both controlled and uncontrolled VOC emissions from the site.

77.b.vii.: Revisions of the pollutant capture efficiency function used for compliance emission calculations in condition 60:

No revisions were made to pollutant capture efficiencies used for compliance emission calculations in condition 60.

77.b.viii.: Summary of physical changes pursuant to Condition 16:

During calendar year 2019, there were no physical changes, additions and/or process modifications or associated pollution prevention projects performed to offset emission increases in accordance with Permit ACDP 34-2681-ST-01 Condition 16 regarding Operational Flexibility.

77.b.ix.: Summary of complaints:

During calendar year 2019, there was one formal complaint/inquiry via email on August 5th. The individual requested information about any Ronler Acres unusual emissions to the air the previous day (August 4th) when the individual observed flashing lights and heard loud alarms. Investigation of operations during the period in question did not show anything out of the ordinary. The alarms and flashing lights were likely due to an emergency preparation drill that occurred the evening of August 4th.

77.b.x.: List of major maintenance performed on pollution control equipment:

Attachment C to this annual report includes a list of major maintenance performed on the RCTOs and scrubbers at the Ronler Acres and Aloha campuses. All maintenance records (major and minor) are maintained onsite within the Maximo system and available for inspection upon request.

77.b.xi.: NSPS Subpart Dc reporting requirements:

Intel continues to fire natural gas exclusively in all boilers at the Ronler Acres and Aloha campuses. Therefore, there are no applicable Subpart Dc reporting requirements.

Statement of Certification (as required by Permit Condition 74):

Based on information and belief formed after reasonable inquiry, the statements and information in this document and any attachments are true, accurate and complete. I also certify that all statements made concerning compliance, which are based on monitoring required by the permit but not required to be submitted to DEQ, are true, accurate and complete based on information and belief formed after reasonable inquiry.
