Re: Intel Corporation, Aloha and Ronler Acres Campuses, ACDP 34-2681-ST-01  
Calendar Year 2016 Annual Report

In accordance with the requirements set forth in Oregon Department of Environmental Quality (ODEQ) Permit ACDP 34-2681-ST-01 Condition 77.b., Intel Corporation (Intel) is submitting three (3) copies of this annual report. It should be noted that there were no instances of deviations from permit requirements within the air permit #34-2681-ST-01 to be included in this report for 2016. This annual report is being submitted in a timely manner on or before March 15, 2017 and includes the following:

- 77.b.ii.: The emission fee report
- 77.b.iii.: A summary of the Excess Emissions and Upset log
- 77.b.iv.: The annual certification that the risk management plan is being properly implemented
- 77.b.v.: The type and amount of fuel combusted
- 77.b.vi.: The calculated 12-month rolling emission rates for PM, PM<sub>10</sub>, PM<sub>2.5</sub>, SO<sub>2</sub>, CO, NO<sub>x</sub>, VOC, Fluorides, combined HAPs and individual HAPs

NOTES:

- Reporting for individual HAPs is only required for pollutants with emission rates of 0.1 or more tons/yr
- The GHG emissions report will be submitted on March 31 as per OAR 340, Division 215.

- 77.b.vii.: Revisions of the pollutant capture efficiency function used for compliance emission calculations in condition 60.
- 77.b.viii.: A summary of the physical changes, additions and/or process modifications as well as the pollution prevention project(s) performed to offset emission increases associated with these change/modification, pre-approved pursuant to Condition 16. In addition, the permittee must identify and summarize any change(s) with the associated emission increase of five (5) or more tons of VOC or one (1) or more tons of any HAP on a yearly basis
- 77.b.ix.: Summary of complaints relating to air quality received by permittee during the year
- 77.b.x.: List major maintenance performed on pollution control equipment.
- 77.b.xi.: There are no applicable Subpart Dc specific reporting requirements for affected facilities that are exclusively natural gas fired.

Intel Corporation  
2501 NW 229<sup>th</sup> Ave  
Hillsboro, OR 97124  
[www.intel.com](http://www.intel.com)

**77.b.ii.: Emissions fee report:**

Attachment A to this annual report includes Form F1101 as the emission fee report.

**77.b.iii.: Summary of the Excess Emissions and Upset log:**

There were no excess emissions or upset events in calendar year 2016 to include in the log

**77.b.iv.: Annual certification that the risk management plan (RMP) is being properly implemented:**

The Ronler Acres campus has an RMP and was last updated in March, 2016. The RMP is current and is implemented as required. The Aloha campus does not store regulated substances in quantities exceeding the RMP applicability threshold quantities and therefore does not have an RMP.

**77.b.v.: The type and amount of fuel combusted:**

The Ronler Acres and Aloha campuses only combust natural gas and diesel fuel. The diesel fuel is fired within the emergency generators and fire pumps while natural gas is fired in boilers, RCTOs, heaters, and Point of Use (POU) abatement devices. The quantity of these fuels combusted in 2016 are summarized below for Ronler Acres and Aloha combined.

- Diesel Fuel Combusted
  - Aloha: 2,070 gallons/yr
  - Ronler Acres: 24,754 gallons/yr
  - Total: 26,824 gallons/yr
- Natural Gas Combusted
  - Aloha: 162.6 MMscf/yr
  - Ronler Acres: 1,009.9 MMscf/yr
  - Total: 1,172.4 MMscf/yr

**77.b.vi.: Calculated 12-month rolling emissions:**

Attachment B to this annual report includes the calculated 12-month rolling emission rates for PM, PM<sub>10</sub>, PM<sub>2.5</sub>, SO<sub>2</sub>, CO, NO<sub>x</sub>, VOC, Fluorides, combined HAPs, and individual HAPs with annual emissions of 0.1 or more tons/yr.

**77.b.vii.: Revisions of the pollutant capture efficiency:**

There was no revisions of the pollutant capture efficiency functions used for compliance emission calculations in condition 60 (RCTO emission calculations)

**77.b.viii.: Summary of physical changes:**

Below is a summary of the physical changes, additions and/or process modifications.

- In December of 2015, a Type 1 Notice of Intent to Construct application was submitted for a pilot wet electrostatic precipitator (WESP) to be installed on the oxidizer outlet of D1X RCTO #1. Subsequently, an approval letter was issued (NC 028454). A construction completion form was then submitted noting that construction was completed in May, 2016 and the unit was placed into operation in June, 2016.

- In April of 2016, a Type 2 Notice of Intent to Construct application was submitted for the following projects:

- RP1 Boiler replacement and RP1 & RA2 Burner Improvements
- D1B Emergency Generator Replacements including diesel particulate matter filters
- Aloha F15 Fitness Center Hot Water Heater replacement

This application was approved in May of 2016 and construction has commenced on all of the projects. The Aloha F15 Fitness Center hot water heater and D1B Emergency Generator replacement projects are now complete. The RP1 and RA2 boiler projects are ongoing and expected to be completed in Q2 of 2017.

- In August of 2016, a Type 2 Notice of Intent to Construct application was submitted for the incorporation of two office buildings previously owned and operated by Maxim Integrated, along Evergreen Parkway adjacent to the Ronler Acres facility. These office buildings include two small boilers, one domestic hot water heater, and one emergency generator. The current plans for these buildings are as office space only.
- In October of 2016, D1X RCTO #7 became operational. This unit is covered under the current ACDP air permit.

**77.b. ix.: Summary of complaints:**

Intel is not aware of any complaints received relating to air quality during calendar year 2016.

**77.b.x.: List of major maintenance performed on pollution control equipment:**

Attachment C to this annual report includes a list of major maintenance performed on the RCTOs and scrubbers at the Ronler Acres and Aloha campuses.

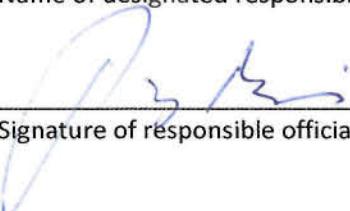

**77.b.xi.: NSPS Subpart Dc reporting requirements:**

Intel continues to fire natural gas exclusively in all boilers at the Ronler Acres and Aloha campuses. Therefore, there are no applicable Subpart Dc reporting requirements.

**Statement of Certification (as required by Permit Condition 74):**

*Based on information and belief formed after reasonable inquiry, the statements and information in this document and any attachments are true, accurate and complete. I also certify that all statements made concerning compliance, which are based on monitoring required by the permit but not required to be submitted to DEQ, are true, accurate and complete based on information and belief formed after reasonable inquiry.*
